Program Statement

#teamwork #initiative #creative thinking #gender balance #mutual understanding. #inter-faith dialogue #respect. #equity

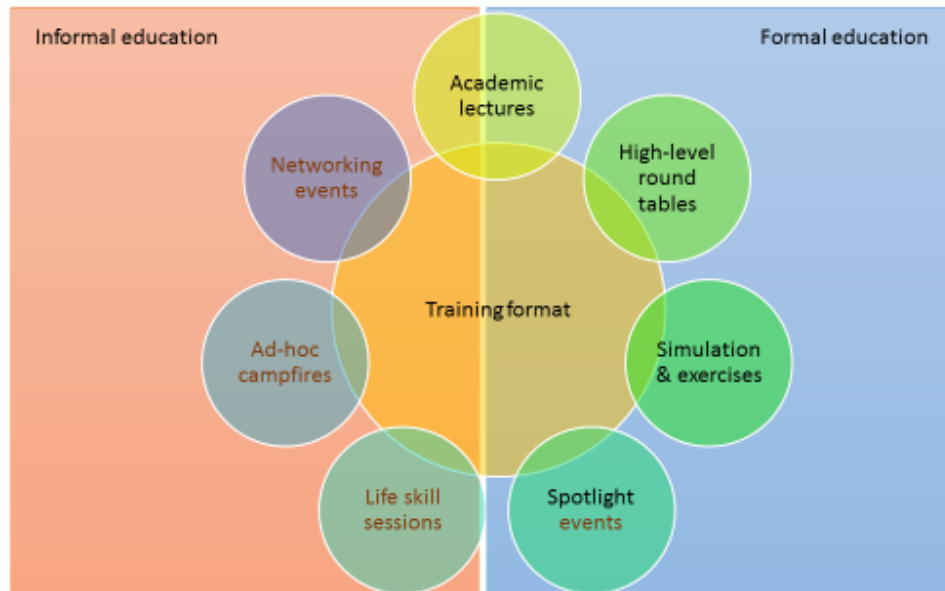

Being addressed to the Black Sea Region and the Balkans emerging decision makers in the fields of intelligence, security, foreign affairs and public diplomacy, one of the main aims of the program is to create the right framework in which young generations can interact freely and creatively, as well as debate with senior stakeholders, academia and high level officials, in full respect of each other and of potentially diverging interests, to promote mutual understanding and respect.

Acknowledging multiculturalism, diversity and inter-faith acceptance as tools to transform societies, the training program aims to contribute to accelerating the pace at which gender balance, community cohesion and inter-faith acceptance is reached in the Black Sea Region and the Balkans, with all categories of citizens participating in leadership on an equal footing, thus preventing loss of talent and biased decision making.
